5. Retention Sensitivity Model Takeaway

S1 Mandate Setup is the single highest-leverage drop-off point in the first-year funnel.
Resolving mandate registration friction is modeled to deliver a +29.7% continuation uplift.
Holistic product overhaul across S1, S2, and S5 could increase active rate from 32% to 53.6%.

6. Research Governance & 12-Month Retention Caveat

Public app store reviews provide discovery evidence and qualitative investor sentiment signals.
They do NOT represent verified account transaction churn or direct clearinghouse records.
Retention projections represent mathematical simulations for roadmap opportunity prioritization.
All 8 synthetic demonstration records remain strictly quarantined from this analysis.
